All so-called matter in the physical world is simply energy. She has intelligence within her! The substance that makes up a physical chair, table, etc. that you use has intelligent life (light) within it. This life are the "electrons" in each atom from which it is made. This intelligent light within responds to every instruction given to it by the consciousness of a human being who has a focus of the Creative Threefold Flame in his beating heart. So, to attract more beauty and perfection around you, which you desire and have not yet realized, is simply a matter of directly calling upon the "Light Center" in every cell and in every atom of the substance around you.

Before you make invocations, you must be still for a moment or two and aware of your ONENESS with this Creative Word, this Power of Manifesting, with the I AM, God's Own Name (2. Book Mose), your own life. You must command the substance of this physical world to preserve for you the beauty that expresses the Divine Plan. The desire for beauty is actually innate to all life; for beauty is one of the greatest attributes of the Deity and therefore man's natural possession. All life is ONE, wherever or however it expresses itself.

So if there is a longing within you, to draw more beauty into this physical world of appearance, just be aware that this is actually in harmony with your Divine Life Plan and that RIGHT THEN you are “in harmony with the Infinite.” You see, your real desire for beauty is a driving force that drives you forward toward victorious and natural fulfillment, not a desire that is contrary to God's will for all.

In other words, you "go with the flow" when you take advantage of natural, forward-moving life and do not get caught up in currents of energy in your limited consciousness, that are not in harmony with the Divine Plan and therefore seek to diminish the glory of that, to hold back the now dawning Golden Age.

The Ray of Beauty is the Crystal Ray, the highest rate of vibrational activity released by one of the Seven Rays. It is the centralized seed of all the rays, whose various colors fold around this crystal-colored ray, their heart center.

Beauty and Love are the true essence of Divine Perfection and the more beauty one expresses (personally and in their surroundings), the higher the vibrational activity of their world becomes.

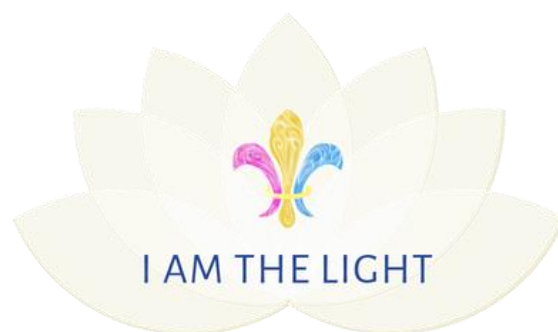

A person's world of thoughts and emotions are creative centers. They constantly receive an influx of life (energy, light substance) from the God Self of the I AM Presence of the person in question. If this influx of life is allowed to flow in and out of the four lower bodies without the interference of human disharmonious thought, feeling, speech or action, the vibrational rate will manifest only perfection. Then that which is applied to an individual would bring forth God-Beauty because its substance corresponded to this perfect vibration of the I AM Presence and to the musical “melody of recognition” (which also naturally belongs to every human being). The presence of a Perfect Being always produces exquisite scents, colors and sounds.

However, by the destructive use of their own divine gift of free will and by forgetting their Divine Source, humans used their creative centers of thought, feeling, speech and action in such a way that they created shadows rather than spreading the light. Thus, they lowered their natural vibrations to the point where the harmony of feeling can no longer be maintained.

Such vibrations then become lower and lower until illness and other limiting evils arise. Life is constant movement. If one does not allow the God-Self to manifest His Plan of Perfection, the very opposite of that Plan manifests itself (through the imperfect consciousness of the four lower bodies).

In order to have more beauty to be expressed in, through and around one, man must accelerate the rate of vibrational activity of his four lower bodies (the physical, etheric, thought and emotional). This is done through the daily, rhythmic use of the VIOLET FLAME, which cleanses the substance that has become laden with disharmony and raises its vibrations into the light, into the natural rate of one's "melody of recognition."

Thus the constant use of the Violet Fire eliminates the causes and germs of human evils. The evil effects simply disappear because their source has dried up. Then the vibrations increase. Because like attracts like, above and below!
